You may email me if you forgot your login information. I will get back to you asap. Don't forget to click on "learn with an example" if you need help. Also, make sure to look at the explanation anytime you get a problem incorrect.

2. House Math Worksheet

(Ch.7 Lesson 4 Review)

3. Measure your room and 3 objects (the highlights in the table) for the Scale-Drawing Mini-Project

(this was assigned on Tuesday, March 10th so you may have it done)

Use your notes. They will be helpful for all of this work. If you don't have your notes, sign-in to the online textbook and look at the examples. You should have your login information for the textbook.

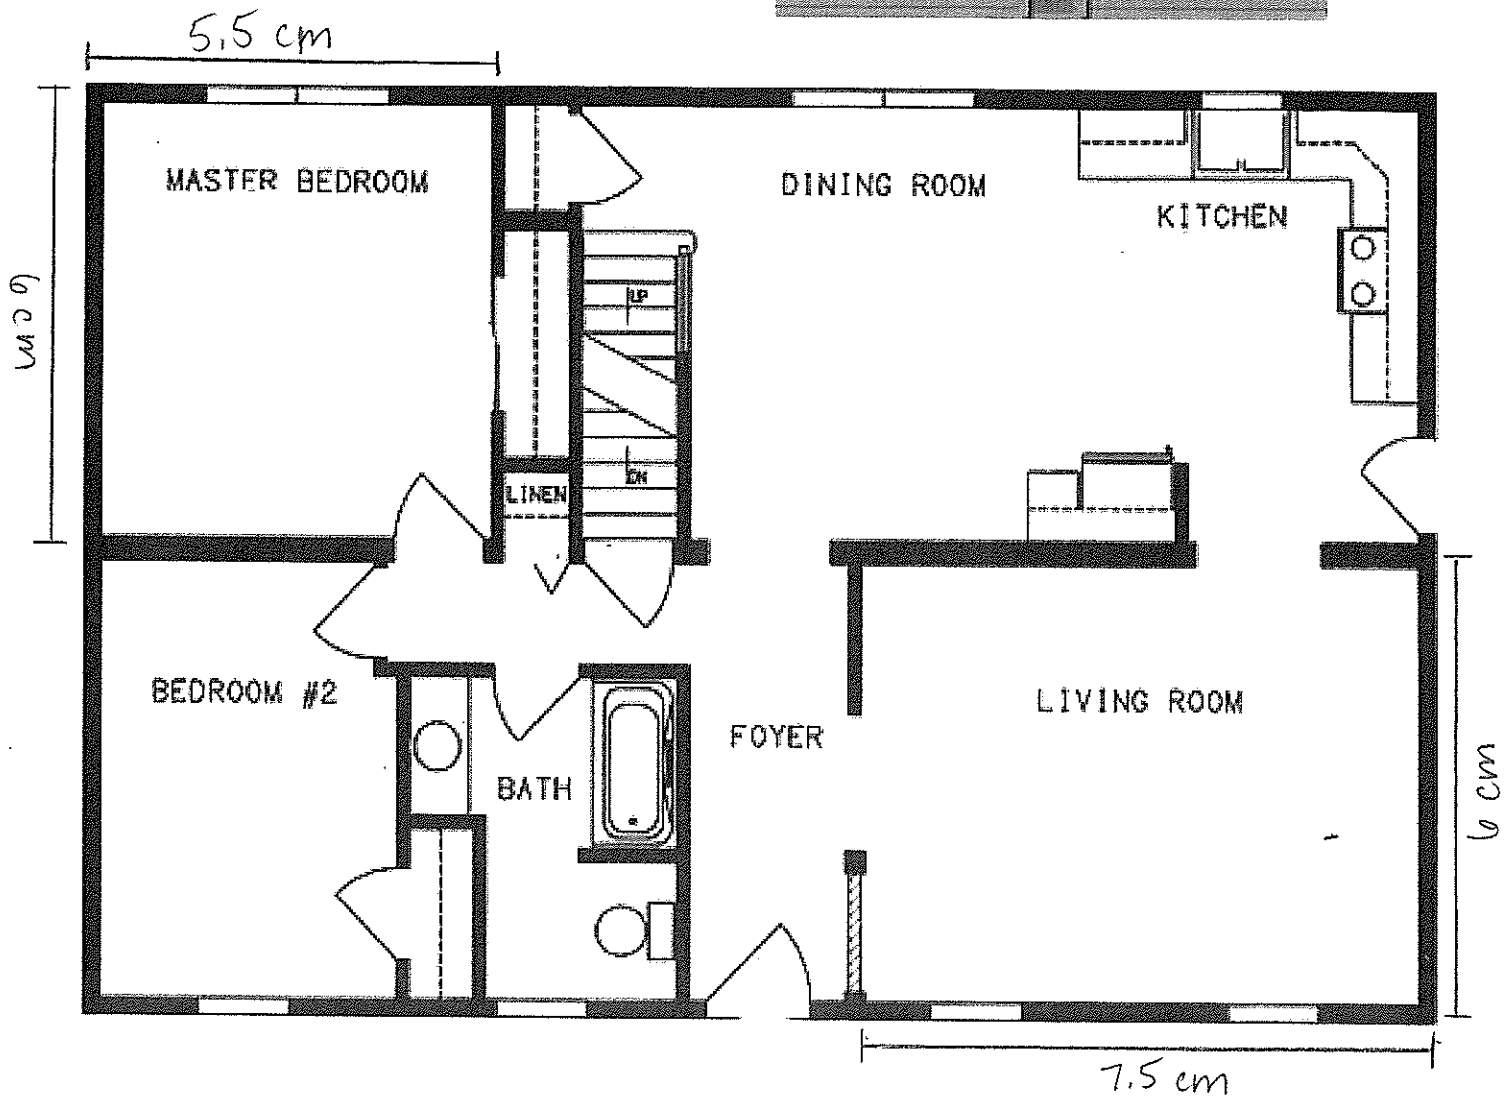

*Reminder: the website is <https://my.mheducation.com/login?logout=true>, your username is first initial, last name, graduation year (no spaces or commas) and your password is tgs, student id (no spaces or commas)

Do your best on this work. You can do it! If you have any questions, email me and I will get back to you asap.

-Ms. Heider

HOUSE MATH

Scale: 1 cm = 2.3 ft

Set up the proportions on a separate paper. You may use a calculator.
Round to the nearest tenth.

- What is the length of the actual living room in feet?
 - What is the width of the actual living room in feet?
 - What is the area of the actual living room?
- What is the length of the actual master bedroom in feet?
 - What is the width of the actual master bedroom in feet?
 - What is the area of the actual master bedroom?
